Dave,

Thank you for the discussion this morning and the follow up email this afternoon.

I have decided that I will allow a short continuance to our order due largely in part to the fact that your customers have not yet received notice of a possible stoppage in service and the September 24<sup>th</sup> date would cause them a great inconvenience.

This creates a need for you to work urgently to complete applications for both your personal use application and the Planning Commission submission for the wireless supplier facility. Matt Mogensen will oversee this process and should be who you contact to ensure you are delivering all the detail that is required to make the short timelines ahead for the October Planning Commission meeting. Please work out with Matt how you will get all the required information to us within the time required.

Rob Houston

City Manager

City of Fountain Valley
